

Instruction Manual of Bluetooth Speaker BS01

Notification

For the user to use the product correctly, make sure the product's performance is good, read it carefully and follow it:

- Do not hit the host seriously.
- Do not contact benzene, diluents and other chemicals.
- Do not close to the strong magnetic field or electric field.
- Avoid direct light or heating equipment.
- Do not disassemble, repair, and transform the product yourself.
- Do not use the product and headsets when riding bikes, driving cars and motorcycles.
- Do not listen to the volume at large volume so as not to adversely affect your hearing.
- Discard packaging, battery and old electronic products. Please classify them properly.
- Please charge it for 6 hours for the first time, after that about 3 hours is enough.
- The recommended power supply is 5V/500mA.
- Charge at least once a month to prevent battery over-discharge to cause shorter battery life.

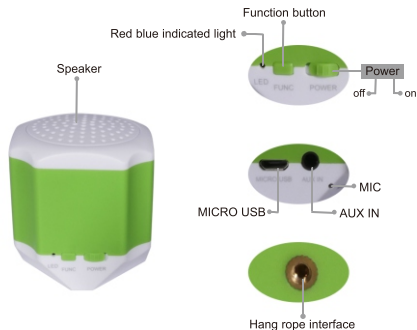

- A long-term non-use product will go into a dormant state, requiring a longer battery charging time to activate the lithium-ion battery. Before fully activating the lithium battery, the product appears to be in the normal condition of a low voltage failure, or the instability of the sound.

Main Functions

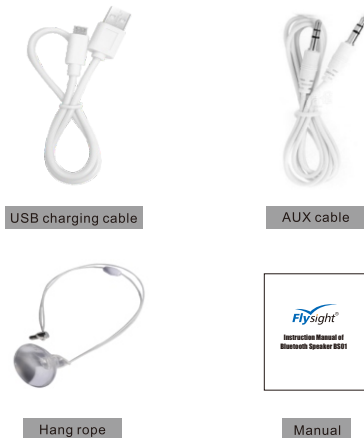

- **Bluetooth connection, without wired bound**
Bluetooth V4.2 + EDR, lower power-saving mode, no longer with the traditional wired bound, enjoy unlimited music fun.
- **Bass boost and forceful**
Super-Bass passive mode, the music bass performance is more powerful.
- **Lithium electricity power, long life**
Built-in large polymer lithium battery to meet the needs of enjoying music at any time of the day.
- **Support audio input**
3.5mm LINE - IN audio jack, easy to connect the phone, computer and other audio source devices.
- **Support a pair of True Wireless (TWS)**
This product can transmit the music on the phone and the computer to two Bluetooth speakers simultaneously, so that

the stereo music is played on two Bluetooth speakers at the same time.

Accessory

Using Instruction

Product charging

When the red light is flashing and there is a low electric note (Boom twice, boom twice, boom once) indicating that the battery is low, please charge it promptly. With the "power switch" to "ON" position, the MICRO USB charger is properly connected to charge the built-in battery for this product, the red light is normally ON, about 3 hours, after charging full, the red light is off, and the blue light is normally ON. Turn the "power switch" to "OFF" position.

Bluetooth connection

Step 1: Turn the "power switch" to "ON". When the speakers are turned on, long press the "function button" for 3S, there will be a voice prompt, and the "red and blue" light will alternately blink, which indicates that the speakers have already been in Bluetooth searching state.

Step 2: Start the Bluetooth function, enter the "setting" of connecting Bluetooth speakers and other equipment, find the related section of "wireless and network", find the "Bluetooth" option, click on the "Bluetooth" to start the Bluetooth function.

Step 3: Search for the Bluetooth device, enter the "Bluetooth

Settings" option, and perform "scan Bluetooth equipment" commands. After scanning,the searched Bluetooth device (AWS - BT) name will be displayed in the "Bluetooth device".

Step 4: match confirmation connection, when the "AWS - bt" appears in the device's Bluetooth device list, which indicates that the speaker has been found. Click on the Bluetooth device "AWS - BT" and the device will automatically pair up well after a few seconds, and the speakers will prompt you. At this time, the blue light flashes fast 1 time every 5 seconds, and the speaker is connected with standby mode. It takes a few seconds for a Bluetooth device to search for connection in general, the exact time is depending on the phone's brand and Bluetooth project (some devices require a matching value of "1234" or "0000" to match the device well).

Step 5: complete the connection
Now in Bluetooth connection state, the user play audio file through the audio equipment of playback software, he user can control music playback through the audio equipment or sound box button , more convenient.

In the boot state, after (AWS-BT) is connected with the external audio source device vice audio cable, the speaker can play the audio information of the external sound source device normally. (Priority Bluetooth connection, when you want to enter the AUX audio playing, stop the Bluetooth audio playing, automatically switch to the AUX sound source to play.)

Troubleshooting

- Switch off automatically while turn it on: the battery is not enough, please use it after charging;
- Playing automatically shutdown or restart: battery lacking to cause low voltage so as not to play, please recharge for use;
- The trumpet is silent: check the volume is turned on, restart the mobile phone and computer equipment;
- Button without function or function error: boot after shutdown;
- Bluetooth connection can't be done: first check whether to turn on the Bluetooth function, then check if doing Bluetooth device search, and confirm whether the the Bluetooth connection is normal, and restart the mobile phone and computer;

Pair TWS

Turn on the two speakers,which are with the same operation method.At the Bluetooth search mode(refer to the Step1 of Bluetooth connection), double-click the multiple function button (red and blue light are on and long "beep" 2 times) and then automatically paired into TWS; then restart the two or manually click on a mobile phone terminal to connect the AWS-BT device, after a few seconds, the music on the mobile phone can be played on the two Bluetooth speakers at the same time. The main and vice Bluetooth speakers output the left and right sound channels respectively. You only need turn your mobile phone to play directly without paring TWS again.

Note: please adjust the distance between TWS matched speakers to less than 5 meters to ensure the quality of signal transmission.

Answering telephone calls

1st step: to make a phone call, after the Bluetooth match is successful, double-click the function button on the speaker, the blue light will flash 2 times every 5 seconds, and the last call number will be returned to the phone. Short press to hang up.

2nd step: answer the phone
Bluetooth pairing is successful, the telephone is coming in, just press the function button once on the speaker, the call will be connected. At this point, call operation can be dome through the speaker. You can speak facing the MIC microphone hole to enhance the call effect, and then short press a time to hang up.

3rd step: refused to answer the phone
After the Bluetooth match is successful, when there is a phone call, the speaker will press the function button for 1.5 second on the speaker to refuse the call.

Clear paired record

Note: restore factory settings, please put "power switch" on the "ON" position, the charger is connected correctly with the MICRO USB interface into the charging state, long press function button for 6 seconds, red and blue lights flash 2 times and hear long "beep" twice, the paired records is cleared.

AUX input usage

Supports audio files that are played as audio devices and connected to other audio sources via audio lines.

Product specification

Bluetooth standard	Bluetooth 4.2+EDR
Transmission distance	20 meters
AUX audio input	3.5mm standard interface
AUX sensitivity	600mV
Rated power	3W
Frequency response	80-18KHZ
Rated impedance	4 ohms
Power adapter	Micro USB 5V/500mA
Built in battery	built-in polymer battery, 500mAh, 3.7V
Playing time	5-10 hours
Working temperature	-10°C-40°C
Storage temperature	-20°C-50°C
Size	48×46mm
Weight	80g
